SPRING / SUMMER

 **PODARTIS**  
clinically tested footwear

Podartis specializes in the production of footwear, insoles, stockings, braces and materials for the prevention and treatment of the main walking pathologies such as hallux valgus, hammer toes, rheumatic foot, diabetic foot and post foot surgery.

The company's flagship product, the result of more than 30 years of research, is its cutting-edge solutions for the diabetic foot.

Every product made by the company is rigorously clinically tested to meet the highest quality standards in the sector and guarantee maximum protection and comfort.

Continuous product innovation has its source in a constant commitment to research, linked to medical-scientific comparisons and collaborations with some of the most authoritative international experts.

The patents that characterize Podartis products are direct evidence of the company's mission: to help people walk well to live better.

SPRING  
SUMMER  
2025

NEW  
COLLECTION

- 14. | WOMEN'S collection
- 66. | MAN'S collection

## COLLECTION HIGHLIGHTS

### New DCS Light outsole D LITE

The DCS Light is a fiberglass insert placed inside the high-density EVA Piuma Podartis outsole.

D-lite Technology provides:

- an **elastic response that facilitates stride**
- **control of pronation and supination excesses**
- **increased propulsive phase thrust**
- **controlled semi-rigidity**

The D-lite sole is suitable for people who need protection and stability when walking.

### Antibacterial Green Tech

The new specific footbed for the Asolo line covered in organic nappa leather made from corn. Technological and bio-sustainable fibres to improve our life on the planet.

ANTIBACTERIAL

CLINICALLY TESTED

ECO-FRIENDLY

# PODARTIS VEGAN

More and more customers are demanding vegan footwear, whether for ethical reasons (use of “cruelty free” footwear, i.e., footwear that does not use materials of animal origin), or to obviate allergies to metals, or for simple desire to be in line with the green dynamics now ubiquitous in our society.

Here's full range of Vegan styles (18 on women's collection + 10 on men's collection):

- All Deambulo W's and M's styles (Fly, Via, Deambulo, Alan) - Total of 8 styles.
- All Activity Next colourways - Total of 2 styles.
- All Activity Zephyr LTD White (unisex) , Zephyr grey (unisex) , Zephyr W LILAC, Zephyr W Platinum - Total of 4 styles.
- All Activity Saturn colourways - Total of 4 styles.
- PA20478 Palladio col. desert - Total of 1 style.

# PODARTIS GOES GREEN

The absolute need for a sustainable and conscious choice in the context of the materials used in the collection is more than ever a duty and a commitment in the face of sudden changes in the climate.

Here are the main steps in the field of sustainability in the collection:

- Most of our material supplier use during their production process, **100% green energy**.
- We use leathers from **LWG GOLD** certified tanneries.

LWG certification is a guarantee mark for companies operating in the leather world, (tanneries). It is a recognition that rewards companies in the sector that manage the environmental impact and sustainable economy from a system perspective.

This environmental audit protocol was developed by leather brands and manufacturers, with input from NGOs such as WWF and Greenpeace. It is updated regularly to ensure it remains relevant and takes into account the needs and evolution of the sector.

• The covering of the insoles of the Asolo line has also been confirmed this year. All Asolo insoles are covered with a biocompatible nappa leather called “antibacterial green tech”. This antibacterial microfiber is in fact made using a combination of derivatives of corn processing, with an impact of reducing emissions by 60% in the production phase. This material also has high characteristics of breathability, it is odorless, washable and completely recyclable.

• All 4 Fancy styles on this collection (2 LEATHER PEARL WHITE colourways + 2 BLUE colourways) and 3 Adelle styles have upper mesh (on vamp and quarters) made with recycled polyester certified GLOBAL RECYCLE STANDARD (GRS).

  
**PODARTIS**  
GREEN

# COLOUR CONCEPTS SS2025

In a transitional period marked by major changes in technology and social mores, two different, completely opposing attitudes predominate for the color trends of summer 2025:

**The drive toward the virtual society of the future.** It is the theme of the metaverse and artificial intelligence.

Standard bearers of this macro-trend are colors:

- **FUTURE DUSK BLUE:** the color of summer 2025. A dark and intriguing shade, between blue and purple, in this time of immense change, the digital transition, and in more symbolic terms the transition from darkness to light.
- **CORAL RED:** An energizing and pleasant color that appeals to the pursuit of joy. Its brightness makes it a symbol of rebirth and an expression of self-care.
- **CHALK (chalk gray):** an increasingly important basic tone inspired by the new frontiers of robotics. It is a color that expresses both serenity and elegance.

• **ROSE DUST (dusty pink):** this dusty pink is becoming a classic in these times of great change, when consumers will be more attracted to medium tones and basic neutrals.

**The desire to return to a physical connection with the world.** It is the theme of nostalgia that is configured with the aesthetics of the American myth of the 1950s, and its typically saturated colors related to the photographic technique of the time:

- **PAPAYA ORANGE:** a full but at the same time glossy tone that in its declinations reaches up to brick tones.
- **SUNFLOWER YELLOW:** new research, underway in the UK, proposes using sunflowers as the sole source for material production, providing everything from cellulose for textiles to pigments for dyes. Here ripe yellow thus becomes the star color of new sustainable horizons.
- **ALOE GREEN:** the relaxing shade of green with teal represents the spectrum of "green" tones for summer 2025.

# STYLE THEMES - Modula line

## GOA

One of the world's most celebrated natural habitats for snakes, where the tradition of enchanters has roots dating back thousands of years, inspired this green python scale patterned leather. A gracefully ethereal look with a semi-gloss satin finish for more classic consumers offered in **dark blue, silver, and platinum.**

## NAGA

In South Asia Naga means snake. In traditional Hindu festivals, the Naga is seen as a deity to be shown devotion with rituals and gestures to ask for family well-being, protection, and even fertility. This is the theme of the viperine-effect leathers with iridescent highlights, offered in **black, coral red, and ice colors.**

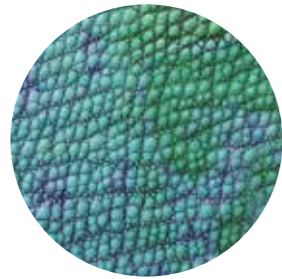

## PERLE'

A hammered leather with a delicate cloudy pearl effect gives rise to a classic summer look suitable for all consumers. The leather, very sunny and full of light is easily cleaned and durable. This is the theme for those looking for a durable product to keep over time.

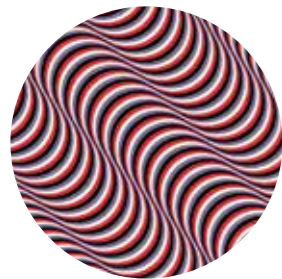

# STYLE THEMES - Sandy line

## TASMANIA

One of the most remote islands rich in native natural species is the inspiration for this lizard embossing theme developed on our suede color palette (**beige, dark blue, orange**). An easy-to-impact casual look suitable for all types of female consumers.

## TWIST

A visually striking theme characterized by high-relief embossing that optically simulates a continuous helical leaf motif. The effect is complemented by the lamination of the vertical walls of the motif, which increases the perception of dynamism and three-dimensionality. For the sunnier and more iridescent look of the Sandy range, we propose the colors **red and white**, perfect for all female consumers who love a modern and sunny look.

## EPOQUE

A delicate victorian floral motif in bas-relief enhanced by a delicate shimmering effect gives this theme a gracefully romantic flavor. The proposed colours are three pastel shades: **pink, mint green and dark blue**. For the more traditional consumers and lovers of delicate colours.

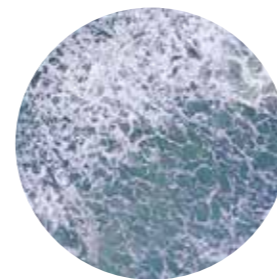

## STYLE

Soft Nappa leather with a glossy finish is combined with leather with a python effect applied in transparency. The result is a refined and distinctive tone-on-tone look, offered in an elegant key in **black and ivory**, and in a more eye-catching summer version in the trend colors sunflower **yellow and blue**.

## CLASSIC BASIC

A general market trend toward durable and quality “standard” products underlies the introduction in the Sandy article range of satin calfskin leather variants in the key colors **dark blue and Dove grey**. An update of the classic Podartis combinations typical of the ready-to-wear collection.

## LEATHER

Soft tassels with a woven pattern distinguish this group with a distinctly casual vocation. A “leather” look suitable for all types of use is designed for female consumers looking for a durable and easily cleaned quality model. The color range for summer 2025 for this group is the most complete of the entire women’s collection: **white, light orange, red-sky, marine blue, and dark blue**.

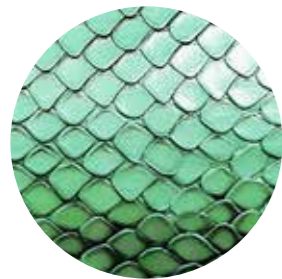

# STYLE THEMES - Asolo line

## CHEVRONS

The geometric lozenge motif typical of woven rattan and bamboo work is here proposed with an embossing on calfskin enhanced by a delicate metallic finish. The result is an opulent, timeless look, proposed in the two classic colors **black and silver**. For consumers looking for a more refined and elegant look.

## SHELBY

A semi-gloss Nappa leather with a tone-on-tone imprinted viper skin motif is the theme of this look with a typical summer character. The three colors **ivory, sage green, and blue**, combined with the cork wedge give this line a casual sportswear flavor suitable for customers of any age group. For consumers looking for a fresh, sunny style suitable for any context of use.

## WOVEN

The evergreen theme of the Asolo line. Natural tanned undyed leathers (neutral base). Embossed and printed with a multicolor grain of rice motif. The essence of the pure summer spirit of the collection is offered with cork coatings and the two colors sunflower **yellow and navy blue**.

## CRAFT

A fashion look inspired by the weaves of palm or banana leaves typical of tropical countries gives rise to leathers with a three-dimensional effect enriched by satin-finished metallic foils. Theme proposed in two colours: **blu navy and light gold**. For customers who love sumptuous looks suitable for all activities outside the home.

## BAMBOO

This theme is inspired by the ancient Balinese tradition of richly decorated and painted woven bamboo baskets. The result is a look with an embossed leather bamboo weave effect, enhanced by elegant metallic highlights. We offer two colors: **red and beige**, both with gold trim.

## MANAUS

The Brazilian city located at the gateway to the Amazon rainforest inspired this look with embossed and printed leather with anaconda skin, the reptile motif prince in summer 2025 fashion. The colors are intentionally subdued and garish (**light gray and taupe**) with the skin pattern emerging in light contrasting shades to create an eye-catching summer look that is at the same time "easy" to match and wear. Suitable for consumers of all ages looking for a current look in step with the latest fashion trends.

# WOMEN'S COLLECTION

# MODULA LINE

## Features

The Modula line has always been one of the market's benchmarks for elegance and technicality.

Podartis **Seamless Technology** reduces the presence of seams on the inside of the product to reduce painful chafing and ensure maximum protection.

### SEAMLESS TECHNOLOGY

Fewer seams. Less pain.

### FLEXPELL®

Self-moldable upper.

### STYLE

Elegant lined wedge.

Width  
**10**

Biomechanical outsole  
**FLEXIBLE**

The biomechanical outsole protects the joints during the steps and ensures an even redistribution of pressure.

The Modula footbed is made of an EVA+PU compound that guarantees continuous cushioning of the step and effective protection over time. Moreover, it is well housed inside the sole hull thanks to the Velcro system that guarantees a high product quality.

The M width, combined with the products' self-modelling properties, make it ideal for rheumatic patients who are sensitive to the refined aesthetic taste of Modula products.

## Outsole focus

- Biomechanical rocker / protects the joints
- 20 Mm heel / correct posture

# SANDY LINE

## Features

The Sandy line focuses on maximum functionality, adapting to each patient's foot.

Podartis **Seamless Technology** reduces the presence of visible seams on the inside of the product to avoid painful chafing and ensure maximum protection. All liners feature high-density materials for improved comfort and have Dermocompatible Lycra® in the foot contact layer.

### SEAMLESS TECHNOLOGY

Fewer seams. Less pain.

### FLEXPELL®

Self-moldable upper.

Width  
**10,5**

Biomechanical outsole  
**FLEXIBLE**

The new Sandy Biomechanical outsole provides greater protection for the foot's joints during gait phases and guarantees a highperformance redistribution of pressure.

The physiological 20mm heel ensures correct patient posture.

The high-density Eva + PU compound of the Sandy footbed ensures continuous cushioning of the step and effective protection especially for rheumatic patients. Dermocompatible microfibre cover.

The 10.5 width, combined with the self-modelling of the products, guarantees an excellent fit even for the most demanding feet.

# ASOLO LINE

## Features

The Asolo Line is a technical and stylistic evolution of the Modula Line.

The new biomechanical Asolo sole with large non-slip sole, the refined materials and the XL width make it ideal for the most demanding customers.

### SEAMLESS TECHNOLOGY

Fewer seams. Less pain.

### FLEXPELL®

Self-moldable upper.

Width

11

Biomechanical outsole

SEMIRIGID

The sole is dual density to ensure cushioning and grip while walking. Semi-rigid at 40% to reduce joint stress and facilitate the biomechanics of walking, while the 25 mm heel allows for better posture.

The technical principles of self-moldable and seamless lining make it ideal for the most sensitive feet and for accommodating even major deformities.

The Asolo footbed is made of PU+EVA to ensure effective cushioning and comfort over time.

## Outsole focus

- Shock-absorbing areas / high resistance
- 25 Mm heel / better posture

# WELLWALK LINE

## Features

The Well Walk Podartis line is designed for all people with foot or joint pain, giving stability at every step, **reducing stress on ankles and knees.**

Unique and original, biomechanically and clinically tested in the best Italian and international laboratories and clinics.

- Harmonious movement for the whole body
- Less stress on the forefoot
- Improves ergonomic functionality
- Promotes joint economy

Width  
**13,5**

Biomechanical outsole  
**SEMIRIGID**

The Timing Rocker® Podartis sole in micro workable with 20mm heel is semi-rigid to 70% and reduces the energy demand for the step, ensuring a smooth transition between the moment of contact and propulsion.

Ideal for dynamic people who love to experience the urban context. Also ideal for diabetic or rheumatic patients at risk 2.

**Seamless Podartis Technology** reduces the presence of visible seams inside of the product to avoid painful chafing and ensure maximum protection. All inner liners feature high density materials for a better comfort.

The choice of WIDTH 11-12 allows to accommodate even the feet with important deformities.

## Outsole focus

- Timing rocker® / 70% semirigid outsole
- Vibram tread / high abrasion resistance

## Natural step timing

The Timing Rocker® Podartis sole in micro workable with 20mm heel is semi-rigid to 70% and reduces the energy demand for the step, ensuring a smooth transition between the moment of contact and propulsion.

Ideal for dynamic people who love to experience the urban context. Also ideal for diabetic or rheumatic patients at risk 2.

**Seamless Podartis Technology** reduces the presence of visible seams inside of the product to avoid painful chafing and ensure maximum protection. All inner liners feature high density materials for a better comfort.

The choice of WIDTH 11-12 allows to accommodate even the feet with important deformities.

## Outsole focus

- Timing rocker / biomechanical outsole with micro
- Support structure / 330 km / m<sup>3</sup> density
- Heel / pod50 density 240kg / m<sup>3</sup> shore a 50

# SNEAKER CITY LINE

## Features

From the need to introduce a "City Chic" style, in line with the trends of the moment, Podartis has developed the Activity City line.

The Sneakers style associated with the Timing Rocker® sole for a physiological and natural step has made it one of the best seller lines of the last seasons.

### SEAMLESS TECHNOLOGY

Fewer seams. Less pain.

### CLOSURE

Easy "one-hand" fitting with Zip closure.

Width  
**10-11**

Biomechanical outsole

**FLEXIBLE - SEMIRIGID**

The new soft sole made of made in Italy EVA foam, is a biomechanical outsole with extreme comfort, designed to reduce joint stress and rebalance pressure peaks.

The compound technology is designed to ensure lightness, softness and elasticity but also abrasion and tear resistance, and good grip on dry and wet surfaces.

## Outsole focus

- 60% Semirigid / superlight bi-density polyurethane
- 70% Semirigid / microporous eva

# DEAMBULO LINE

## Features

Classic line, elegant and light, best seller in shops, appreciated for its extreme comfort.

The sole is biomechanical to reduce joint stress and rebalance pressure peaks.

· Ideal for rheumatic and diabetic patients in risk class 1.

Width  
**12**

Biomechanical outsole  
**FLEXIBLE**

The 12 width makes them particularly suitable for feet that also need custom-made insoles with a significant thickness.

The Flexpell has a sandwich structure with a waterproof outer layer, a self-modelling intermediate layer with open cells that guarantees microcirculation of air and an inner layer in dermocompatible Lycra.

All models are self-modelling and the linings are made with seamless technology to contain slight deformities and grippy fingers.

## Outsole focus

- Flexible timing rocker® / anti-slip pads
- Tread / high abrasion resistance polyurethane

# CASUAL LINE

## Features

Podartis shoes for diabetes prevention are designed according to international guidelines.

For 30 years we have been researching innovative and technologically advanced solutions to improve the protection that therapeutic footwear must offer to a diabetic patient in risk grade 2 and, even more so, in risk grade 3.

- High abrasion resistance
- Stabilisation
- Elastic adjustment

Width  
**11-12-14**

Biomechanical outsole   
**FLEXIBLE - SEMIRIGID**

The Podartis therapeutic shoe is made with **Seamless Technology** that reduces the presence of visible seams inside the product to avoid chafing and ensure maximum protection.

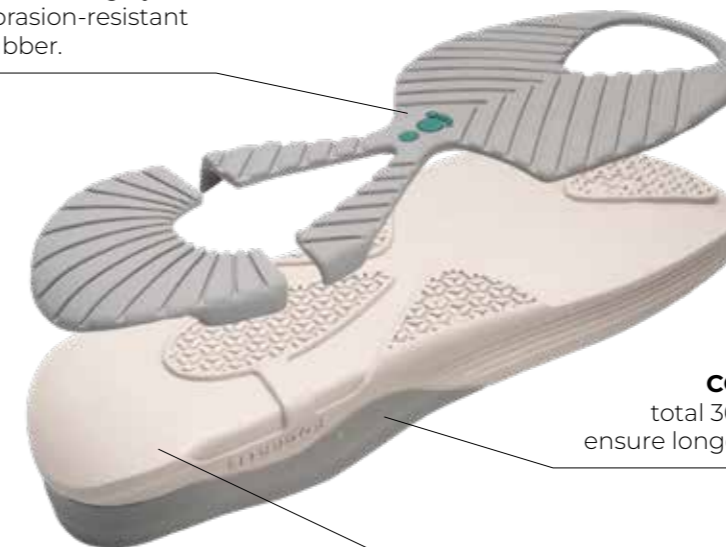

The new **patented DCS Diab sole** is the result of technological innovation: ideal for better control of excess pronation and supination and greater support even in cases of **overWIDTH** (tested up to 140 kg), it consists of a composite fibre support element (DCS), a high-density Eva midsole and a rubber tread with high abrasion resistance and stabilising, anti-collapse lugs.

The lining is made of **dermocompatible Drypod with an abrasion resistance** of over 100,000 cycles. All products in the Diab line feature the Easy Fitting fastening system with Velcro straps to better stabilise the foot inside the shoe.

## Outsole focus

**OUTSOLE**  
made of highly abrasion-resistant rubber.

**COVER**  
total 360° to ensure longer life.

**MIDSOLE**  
high density EVA.

# CLASSIC LINE

## Features

The Classic Line for Men has always been one of Podartis' cornerstones to offer an elegant product for the business man

combining technicality and functionality of the products.

In particular, iconic products such as Giotto, available in three sizes from stock and Botero, available in five different sizes, are in great demand also in the spring/summer season with colour variants in line with current trends.

- Shock-absorbing heel
- Vibram tread
- High abrasion resistance

Width  
11,5  
11-12

Biomechanical outsole  
SEMIRIGID  
FLEXIBLE

The Timing Rocker® Podartis micro-machinable sole is 70% semirigid and reduces the energy demand for stepping, ensuring a smooth transition between the moment of contact and propulsion.

Ideal for Junior - Senior people over 55, with limited joint mobility and progressive bone decalcification. Particularly recommended for diabetic or rheumatic patients in risk grade 2. To increase the performance of effectiveness and protection, it is completed by the use of treads among the best performing in terms of abrasion resistance and cushioning developed in **collaboration with Vibram**.

Podartis **Seamless Technology** reduces the presence of visible seams on the inside of the product to avoid painful chafing and ensure maximum protection. All inner linings feature high-density materials for improved comfort.

The choice of socks allows to accommodate even feet with major deformities, responding fully to all degrees of risk provided by the International **Diabetic and Rheumatic** Triage.
